Cutter Aviation Deer Valley Announces New Maintenance Services Pricing Exclusively for Deer Valley Airport Piston Aircraft Tenants

PHOENIX, AZ – As Phoenix Deer Valley Airport has grown to become one of America's top-ten busiest General Aviation airports, Cutter Aviation also continues to grow and meet the needs of the based aircraft community at DVT as well.

As the newest initiative to better serve DVT based customers in the changing General Aviation environment, Cutter Aviation is pleased to announce new maintenance and technical service pricing exclusively for aircraft based at Deer Valley. Effective immediately, DVT based piston aircraft customers may take advantage of the special shop labor rate of \$79 per hour – a 17% reduction from the previous rate. Non-based piston customers are offered a shop labor rate of \$89 per hour, and all turbine aircraft and avionics work carries a \$95 per hour labor rate.

Since 1997, Cutter Aviation Deer Valley has provided top quality line and fuel service in addition to aircraft technical services to both based tenants and transient aircraft. The DVT General Aviation community has remained committed to Cutter Aviation over the years and this change in pricing reflects Cutter Aviation's commitment back to the based tenant population.

"Customers who haven't used us in recent years for their service needs will be quite pleased to see the positive changes that have been made in addition to our labor rate change" said Brad Kathrins, General Manager of Cutter Aviation DVT. "We've improved the entire service process and customer experience -- our goals are to provide outstanding value, the very best in service quality, and absolute attention to all the needs of the customer – regardless of the size and complexity of the job."

The technical services department and technicians at Cutter Aviation Deer Valley are highly experienced on a wide variety of single and multi-engine piston aircraft from manufacturers such as Piper, Beechcraft, Cessna, Mooney, and others as well as light and medium-size turbine aircraft such as Piper Malibu Meridian and King Air models. Capabilities of the service facility include inspection programs, airframe and powerplant repair and service, modifications and upgrades as well as routine and preventative maintenance service.

Cutter Aviation, in all locations within its network throughout the Southwest, provide the value of an FBO offering an "entire package" of services from line and fuel service to maintenance and avionics service as well as aircraft sales and charter. This full service approach allows pilots and owners to trust Cutter Aviation as a sole source for all their aircraft needs. From the smallest single engine piston planes to large multi-engine turbine aircraft, customers of Cutter Aviation receive the same attention, quality, and customer service as the largest jet crew because "every customer is our best customer."

For more information about aircraft service with Cutter Aviation Deer Valley, contact Brad Kathrins at 623-581-1881 or bkathrins@cutteraviation.com or visit us online at <http://www.cutteraviation.com>.

About Cutter Aviation

Founded in 1928 by William P. Cutter, Cutter Aviation is a full-service aviation company, offering aircraft fueling, maintenance and avionics solutions, aircraft charter and aircraft sales and management. Serving the business aviation industry, Cutter has operations at eight major airports in Arizona (Phoenix, Deer Valley and Phoenix, Sky Harbor), New Mexico (Albuquerque), Colorado (Colorado Springs) and Texas (Dallas, El Paso, McKinney and San Antonio). The company is a member of the Pinnacle Air Network, National Business Aviation Association (NBAA), and the National Air Transportation Association (NATA). Cutter is the oldest continuously family-owned and operated FBO (Fixed Base Operation) with over 80 years of serving the aviation community.
